APPENDIX C

The principles of Appendix C reduce any entry field to a power of two on day two of the event. These principles are achieved with the use of byes, 4-way matches and 2-way matches.

In the special cases of an entry field that exceeds a power of two by one or two teams, 3-way matches (one survivor) will be used. In such cases the staff shall seek withdrawals from the field prior to posting the first round pairings.

Page two offers a brief explanation of the pairing concept, with several examples. The pages that follow indicate first round pairings.

In the pairing grid which follows:

- N = number of teams entered
- E = number of teams to eliminate
- B = number of byes
- F = number of 4-way matches
- T = number of 2-way matches
- R = reference number
- S = sum of the seeds

Instructions for First Round Matches					
1) Find the number of teams N in the table					
2) If there are 2-way matches, they are assigned as follows:					
		B+1	vs	N	
		B+2	vs	N-1	
			...		
		B+T	vs	N-T+1	
Note the sum of the 2 seeds is $B+N+1 = S$					
3) If there are four-ways, they can be arranged as follows:					
		1st seed	2nd seed	3rd seed	4th seed
		R+1	R+2F	R+2F+1	R+4F
		R+2	R+2F-1	R+2F+2	R+4F-1
			...		
		R+F	R+F+1	R+3F	R+3F+1
First seeds play fourth in the afternoon, second seeds play third					
Note the sum of the seeds playing in the afternoon is $2R+4F+1=S$					
N.B. Special cases of power of two +1 and +2					
Below is a worked out example which works for any of N=39,40,47,48,49,50					
In each of these cases R=11 and S=51					
The 4-way matches are the same for each of these numbers of teams					
	#1 seed	# 2 seed	#3 seed	# 4 seed	
	12	25	26	39	
	13	24	27	38	
	14	23	28	37	
	15	22	29	36	
	16	21	30	35	
	17	20	31	34	
	18	19	32	33	
Note that the sum of seeds is 51; moreover the sum of #1,#2 seed in the same 4-way is 37
